CLEARANCE

CPENT
Certified Penetration Tester Pro
EC-Council · Nov 2024

CEH Master
Certified Ethical Hacker — Master
EC-Council · Apr 2024

CEH Practical
CEH Practical
EC-Council · Apr 2024 · 180/200

CEH v13
Certified Ethical Hacker v13
EC-Council · Dec 2025

CHFI
Computer Hacking Forensic Investigator
EC-Council · Dec 2023 · 90.7%

ISO 27001 LA
Lead Auditor — ISO/IEC 27001:2022
MasterMind · Jan 2026

EHE
Ethical Hacker Essentials
EC-Council · Jan 2026 · 96%

CRTOM
Certified Red Team Ops Management
Red Team Leaders · Jan 2026

CTIGA
Threat Intel & Governance Analyst
Red Team Leaders · Jan 2026

CCPP
Certified C++ Practitioner
Red Team Leaders · Jan 2026

CCEP
Certified Cybersecurity Educator Pro
Red Team Leaders · Jan 2026

Log Analysis
Foundations of Log Analysis
Red Team Leaders · Jan 2026

TOEFL iBT
English Proficiency
ETS · Jul 2024 · 91/120

root@nisarg:~$ cat PROFILE.log

Award-winning Offensive Security Engineer and elite Penetration Tester holding CPENT, CEH Master (91.2%), CHFI (90.7%), and ISO/IEC 27001:2022 Lead Auditor — placing among the highest-scoring EC-Council certified professionals globally. MSc Cyber Security candidate at BCU, bridging red-team exploit development with AI/ML threat intelligence research. Experienced across full-scope penetration testing, digital forensics, cloud IAM security, and network engineering; identified CVSS 10.0 RCE vulnerabilities and architected Python-based security automation pipelines.

root@nisarg:~$ cat EXPERIENCE.log

IT Hardware Support Engineer
[Mar 2025 – Sep 2025]
NIVA TECHNO TRANSITION · *Surat, India*

- Installed and maintained enterprise computing systems and LAN/Wi-Fi infrastructure; diagnosed hardware/software/network faults; performed security checks, OS updates, and provided on-site and remote technical support.

Vulnerability Assessment & Penetration Tester
[Feb 2024 – Feb 2025]
SYSAP TECHNOLOGIES · *Pune, India — Remote · Part-Time*

- Executed full-scope penetration tests across web apps, REST APIs, networks, and cloud environments via Metasploit, Burp Suite, Nmap, Nessus, and OpenVAS; classified vulnerabilities per CVSS v3.1 and OWASP Top 10 with full exploitation PoC.
- Delivered executive-ready pentest reports with attack narratives, root-cause analysis, and prioritised remediation roadmaps; re-tested all critical findings post-patch; tracked adversary TTPs via MITRE ATT&CK.

Vulnerability Scanning & Penetration Testing Intern
[Jul 2023 – Jan 2024]
SYSAP TECHNOLOGIES · *Pune, India*

- Scanned 50+ systems with Nessus/OpenVAS against OWASP Top 10, CWE, NIST SP 800-115; contributed to live engagements — recon, exploitation, and privilege escalation using Nmap and Metasploit; authored formal pentest reports.

Network Specialist
[Jan 2023 – Apr 2023]
AIRLINK COMMUNICATION PVT. LTD. · *Surat, India — Internship*

- Network troubleshooting and monitoring; router/switch config, documentation, and customer technical support.

Network Engineer
[Jun 2022 – Jul 2022]
NIVA TECHNO TRANSITION · *Surat, India — Internship*

- Network infrastructure setup, structured cabling, access-issue resolution, and technical documentation.

root@nisarg:~$ cat PROJECTS.log

Aegis-IAM Dashboard | Cloud Security & Risk Intel [GitHub ↗]
Python · AWS IAM · NetworkX · MITRE ATT&CK · OWASP

- Python IAM risk-analysis platform parsing AWS JSON exports; auto-detects over-privileged identities, SoD violations, and assume-role escalation paths via NetworkX graph engine; integrated MITRE ATT&CK tagging and OWASP-compliant remediation pipeline.

AI-Driven Vulnerability Severity Predictor | ML & Deep Learning [GitHub ↗]
Python · Scikit-Learn · TensorFlow · NVD Dataset (337,705 CVE records)

- Processed 337,705 NVD CVE records (Lasso, ElasticNet, Mutual Information → 13 predictors); trained Extra Trees, Gradient Boosting, LSTM, GRU — R^2=0.9988, MAE=0.0400, CV R^2=0.9990 for production-ready CVSS Base Score prediction.

Predictive IoT Network Flow Analysis | ML & Telemetry [GitHub ↗]
Python · TensorFlow · Scikit-Learn · RT-IoT2022 (117,000+ records)

- 24 model configs on RT-IoT2022 (117K+ records); Gradient Boosting achieved R^2=0.9999 / MAE=0.0010; Extra Trees maintained R^2=0.9996 after 87% dimensionality reduction.

Android Malware Detection System | Mobile Security & ML [GitHub ↗]
Python · XGBoost · Scikit-Learn · Drebin (15,000+ samples)

- Static-analysis APK pipeline on Drebin (15K+ samples); L1 Regularisation + Chi-Square feature extraction; XGBoost F1-Score 98.47% and near-perfect ROC-AUC.

AI-Powered DDoS Detection | ML & Network Defence [GitHub ↗]
Python · TensorFlow · XGBoost · CIC-DDoS2019 (225,000+ records)

- NIDS on 225K+ CIC-DDoS2019 records via 1D-CNN, MLP, ensemble; XGBoost achieved 1.0000 precision and 99.99% accuracy — zero false-positive analyst alerts.

Adaptive Vulnerability Risk Scoring | AI Threat Assessment [GitHub ↗]
Python · XGBoost · Random Forest · KNN · One-Hot Encoding

AWS IAM · API Security · Zero-Trust · DevSecOps · SAST/DAST · Secure SDLC

> ML / AUTOMATION

Python · TensorFlow · XGBoost · Scikit-Learn · NetworkX · Bash

> FORENSICS

Chain of Custody · Disk Imaging · Mobile Forensics · IoT Forensics · ISO 27037/42/43 · UK GDPR · FSR · NIST · HIPAA · PCI-DSS

> PLATFORMS

Kali Linux · Parrot OS · Ubuntu · Debian · macOS · iOS · Android · Windows 11

EDUCATION

MSc Cyber Security
Birmingham City University, UK
Expected Mar 2027 · Professional Placement

B.Eng. Computer Science & Eng.
SN Patel Institute — GTU, India
Jan 2024 · CGPA 7.86 / 10

Diploma — Computer Engineering
NG Patel Polytechnic — GTU, India
Jan 2021 · CGPA 7.80 / 10

LANGUAGES

- English — Native / Bilingual (TOEFL 91)
- Hindi · Gujarati — Native / Bilingual

- Dynamic context-aware 0–10 risk scoring over static CVSS; engineered TCP/UDP feature pipelines; validated XGBoost, RF, Decision Tree, KNN regressors via MSE, RMSE, MAE, R^2.

root@nisarg:~$ cat ACADEMIC_LABS.log

⬡ End-to-End Penetration Testing & RCE Assessment
└ Nmap · Metasploit · Redis · Openfire · Git Hooks · Reverse Shells · CVSS 10.0

- CVSS 10.0 RCE across Redis, Openfire, and Gitea; system-level access via Redis replication abuse, Openfire admin exploit, Git Hooks weaponisation; professional pentest report delivered.

⬡ Digital Forensic Investigation Strategy — Missing Person Case
└ FTK Imager · Autopsy · Magnet AXIOM · MOBILeadit · ISO 27037/42/43 · UK GDPR

- ISO-aligned forensic plan — endpoints, mobile, IoT, cloud, CCTV; full chain-of-custody and timeline reconstruction compliant with UK GDPR, NPCC, and FSR.

⬡ Strategic Security Audit — Cyberzone AI Ltd. (AI Healthcare & Fintech)
└ ISO/IEC 27001:2023 · UK GDPR · DPA 2018 · HIPAA · FIDO2 · Purple Team

- Full ISO 27001:2023 audit; identified identity gaps and patching weaknesses; phased roadmap — MFA (FIDO2), immutable backups, Purple Team recommendations.

root@nisarg:~$ cat RESEARCH.log

⬡ AI & Autonomous Penetration Testing Frameworks
└ MSc Dissertation · BCU · 2025–26

- Evaluated DRL and LLMs in autonomous offensive security; compared MAS vs single-agent success-rate metrics on zero-day targets; proposed Neuro-Symbolic AI + HITL governance framework compliant with EU AI Act and GDPR.
- IT Project Management: 7-week Hybrid Agile-PRINCE2 plan (Monday.com, 5-phase WBS) for autonomous AI-driven pentesting system with GDPR/EU AI Act compliance guardrails.

root@nisarg:~$ cat BLOG.log

⬡ Technical Security Blog · nishu2402.github.io/blog/index.html
└ Personal knowledge-sharing platform covering offensive security research, networking, cybersecurity hardware and software tools and ethical hacking and penetration testing.
